DETAILED ACTION

In view of appellants arguments in the appeal brief of 11/14/2003 and up further consideration, the examiner withdraw the finality of paper Num. 9.

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter. For example (specification page 1, line 6 and page 2, line 3) applicants should not point out to claim numbers in the specification and (specification page 4, lines 27 and 29) "frame (-work)" is not clear what applicants are referring to; etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 as filed in the preliminary amendment with the application on 3/29/2001 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 recites the limitation "the top strand" in line 8; "the push-in direction" in line 9; "the beginning of the top strand" in line 20; "the further stops" in line 24; "the gap" in line 24. There are insufficient antecedent basis for these limitations in the claim.

Art Unit: 3721

Further, claims 1-5 are indefinite, the claims are written in functional terms. It is not clear what structures are being positively claimed. Are the “enclosures” and the “envelopes” claimed? What are the “enclosures”?; line 13, where are the “stop means are arranged along the top strand”?; etc.

In (claim 1, line 12) “...the envelope-conveying belt, and raised from it,.” is vague and indefinite, because it is not clear what applicants are referring to by “raised from it,”; do applicants referring to raised from the envelopes, conveyor, push in arrangements, etc?;

In (claim 3, line 3 and claims 4 and 5, line 2) “..which spring tongues or pairs of leaf-spring...” it is not clear which one applicants are positively claiming is it the “spring tongues” or the “pairs of leaf-spring elements”?; etc.
